31120855

Country: United States
Title: ABC News/Ipsos Poll: February 2024
Survey Organization(s): Ipsos
Sponsor(s): ABC News
Field Dates: February 9 - 10, 2024
Sample: National adult
Sample Size: 528
Sample Notes: None
Interview mode: Web-based survey
Weight Location: Columns 10-16 (xx.xxxx) -- Varname: WEIGHT
No. of records per respondent: 1

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

The Roper Center Transparency Score Project is intended to measure disclosure of key elements of survey research. The Transparency Score is not an indicator of data quality. Transparency Project scores are calculated as follows: (10 points for providing a dataset+2 points for every other applicable core item+1 point for every applicable additional item)/(total possible points) X 10. Studies with a score ≥ 9 and ≤ 10 greatly exceed Roper Center requirements; scores ≥ 8 and < 9 exceed requirements; and scores ≥ 6 and < 8 meet Roper Center requirements.

Study Note

-The full question wording for "Contact" is provided below:

"We often conduct opinion polls for clients who will publish the results. The sponsor of this research, ABC News, may want to contact some of the respondents to hear more of their opinions about the topics asked about in this survey. If you are willing to be contacted by a reporter, we will need to pass along your name and phone number, as well as some of your responses connected to this survey. This information would be used by the reporter only to facilitate contacting you. If you would be willing to participate in an interview (on-the-record and for attribution), please check "yes" below. If not, please check "no." Your information will not be shared without your consent."

-Respondents to KnowledgePanel® surveys receive 1,000 points redeemable for cash, games, gift cards, and other merchandise from KnowledgePanel®'s online marketplace for ever survey session they complete, which is equal to \$1, and a one-time \$10 reward for the introductory survey. For those without internet access, a laptop or tablet with free internet access is provided for as long as the respondent remains a member of KnowledgePanel®.

KNOWLEDGE PANEL® | OVERVIEW

Be Sure with KnowledgePanel®

Ensuring accuracy with an industry leading representative random sample, exceptional response rates and coverage

KnowledgePanel has been at the forefront of conducting online research for more than two decades. Backed by scientific design, statistical rigor and sector expertise, it provides consistently high-quality measurement.

KnowledgePanel is the largest probability-based online panel in the U.S.—with about 55,000 members. Our research capability spans all industries from public health to commercial services and products. We have the most experienced analysts and online panel research team in the industry. And, with thousands of profile variables, we can reach all with the cost benefit of online survey administration without sacrificing accuracy.

With address-based sampling (ABS), KnowledgePanel provides a statistically valid representation of the U.S. population as well as many difficult-to-survey populations:

- cellphone-only households
- African Americans
- Latinos
- young adults (ages 15+)

Rigorous design, superior coverage, panel size and sound methodology make KnowledgePanel® the most suitable choice for a broad range of commercial, academic, and governmental applications.

The key design advantages of KnowledgePanel

- **We address self-selection bias by choosing respondents.** Our efficient sample design uses a single sampling frame: the Delivery Sequence File (DSF) of the United States Postal Service, covering almost 100% of the U.S. population.
- **We address participant fatigue by ensuring minimal survey burden.** Panelists take on average two KnowledgePanel surveys a month, minimizing respondent fatigue and attrition. Our research has highlighted a stark difference in the burden on KnowledgePanel members compared to opt-in participants:

Panel Hygiene

Number of surveys in a typical month from all sources:

We would like to think about surveys you take online over the internet. About how many ONLINE surveys would you estimate that you complete in a typical month?

	KP Members	Opt-in
Mean	7.25	26.8
Median	5	15

About 80+ percent of KP members only belong to KnowledgePanel. The same stat of solo panel membership for Opt-in samples is at 33.

- **We address mode bias.** Mixed-mode effects have been found with dual-mode online and telephone methods. KnowledgePanel provides non-internet households with a netbook and internet service to enable a single mode of data collection. The example below highlights the impact of mode on the responses of similar demographic groups:

Question		Telephone	Online
Do you favor or oppose providing a legal way for illegal immigrants already in the country to become citizen?	Strongly favor	33.3*	20.3
	Somewhat favor	31.8	34.5
	Somewhat oppose	11.5	24.1
	Strongly oppose	23.4	21.1

*significant difference by mode at 95% confidence

- **We address coverage bias.** We provide coverage of hard-to-reach populations such as Hispanics across all acculturation levels, minority young adults, low income households, populations with low educational attainment, youth and pre-teens.

- **We address coverage of U.S. Hispanics.** You no longer need to rely on expensive and problematic methods when conducting Hispanic research. KnowledgePanel LatinoSM has reinvented research to meet the needs of the online survey age without sacrificing population representation and the sound sampling principles you expect. We uniquely cover about 93% of U.S. Latino households. This encompasses Spanish- and English-dominant and bilingual households alike, as well as U.S. Latinos who do not have access to the internet at least occasionally.
- **We address non-response bias.** We lead the online research industry in terms of the proportion of the respondent pool that actually participates in our research. This is partly the result of our efforts to “convert” non-responders.
- **We can calibrate.** KnowledgePanel CalibrationSM meets the needs of studies involving either exceptionally large sample sizes or the targeting of very small sub-populations/local geographies. This blended web sample approach is an effective methodology when compared to conducting the survey exclusively with non-probability opt-in panels. When calibrated, the combined sample sources—KnowledgePanel and opt-in online samples—result in higher accuracy over the use of an opt-in sample alone.

We know our panelists. We maintain an extensive, multi-year database of more than 2,000 profile variables based on survey respondents. Updated annually, the database is used to identify unique subgroups that are otherwise unattainable online. With the breadth of Ipsos KnowledgePanel profiles, we are able to:

- target the specific survey respondents you need, so that you don’t need to waste valuable time in your custom survey
- integrate analytic value from profile packages—this might include, but is not limited to, information about political affairs, lifestyle, media, shopping habits, financial views, technological sophistication and more
- create custom panels based on collected characteristics, behaviors and attitudes of Ipsos KnowledgePanel members, eliminating the cost of newly recruiting a panel

Ipsos expertise applied

We believe that the true value to you of working with our company lies in the knowledge of our people and having their know-how and creativity, motivation and commitment applied to your needs. KnowledgePanel alone cannot tell a story, provide actionable recommendations or create the best survey or sample design to find them either, but Ipsos’ experts can. Our team members combine and

apply their industry experience and specialist knowledge to every project—so you can be assured you’ll not only receive the best survey/sample design but the best insight on which to act too.

Understanding the public sector

Ipsos KnowledgePanel is the trusted source of relevant public opinion information that enables its clients to make smarter decisions. Our experts combine their passion with Ipsos’ long-standing data science experience. This allows us to deliver vital global insights matched with local intelligence from more than 100 countries. By using innovative technologies and data sciences, we turn big data into smart data, enabling its clients to address critical concerns in public policy, health policy and services, epidemiology, environmental protection, political science, sociology, social psychology, and many other fields.

About Ipsos

Ipsos is an independent market research company controlled and managed by research professionals. Founded in France in 1975, Ipsos has grown into a worldwide research group with a strong presence in all key markets. Ipsos ranks fourth in the global research industry.

With offices in 89 countries, Ipsos delivers insightful expertise across five research specializations: brand, advertising and media; customer loyalty; marketing; public affairs research; and survey management.

Ipsos researchers assess market potential and interpret market trends. They develop and build brands. They help clients build long-term relationships with their customers. They test advertising and study audience responses to various media and they measure public opinion around the globe.

Ipsos has been listed on the Paris Stock Exchange since 1999 and generated global revenues of €1,780.5 million in 2017.

GAME CHANGERS

TOPLINE & METHODOLOGY

About the Study

This ABC News/Ipsos poll was conducted February 9 to 10, 2024, by Ipsos using the probability-based KnowledgePanel®. This poll is based on a nationally representative probability sample of 528 adults age 18 or older. No respondents were removed from the final data for refusing all of the survey items.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult US population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households invited to join the panel are randomly selected from all available households in the U.S. Persons in the sampled households are invited to join and participate in the panel. Those selected who do not already have internet access are provided a tablet and internet connection at no cost to the panel member. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methodologies, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population. KnowledgePanel members receive a per survey incentive, usually the equivalent of \$1 (though for some it is \$2) in points, that can be redeemed for cash or prizes. No prenotification email for this study was sent prior to field. Panelists receive a unique login to the survey and are only able to complete it one time. One reminder email was sent for this study.

The margin of sampling error is plus or minus 4.5 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.09. The margin of sampling error is higher and varies for results based on sub-samples. Sampling error is only one potential source of error. There may be other unmeasured non-sampling error in this or any poll. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.

The study was conducted in both English and Spanish. The data were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status, household income, and party identification. The demographic benchmarks came from 2023 Current Population Survey (CPS) from the US Census Bureau. Party ID benchmarks are from recent multi-night ABC News polls. The weighting categories were as follows:

- Gender (Male, Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other or 2+ Races Non-Hispanic, Hispanic)
- Education (High School graduate or less, Some College, Bachelor, Masters and beyond)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under \$25,000, \$25,000–\$49,999, \$50,000–\$74,999, \$75,000–\$99,999, \$100,000–\$149,999, \$150,000+)
- Party ID (Democrat, Republican, Independent, Something else)

February 9-10, 2024	33	23	3	41	-

2. How much, if at all, do you blame each of the following for Congress not passing legislation intended to decrease the numbers of illegal border crossings at the U.S.-Mexico border?

	<u>A great deal</u>	<u>A good amount</u>	<u>Not much</u>	<u>Not at all</u>	<u>Don't know</u>	<u>Skipped</u>	<u>A great deal/A good amount (net)</u>	<u>Not much/Not at all (net)</u>
Joe Biden								
February 9-10, 2024	35	14	18	15	18	1	49	32

	<u>A great deal</u>	<u>A good amount</u>	<u>Not much</u>	<u>Not at all</u>	<u>Don't know</u>	<u>Skipped</u>	<u>A great deal/A good amount (net)</u>	<u>Not much/Not at all (net)</u>
Donald Trump								
February 9-10, 2024	29	10	14	28	19	1	38	42

	<u>A great deal</u>	<u>A good amount</u>	<u>Not much</u>	<u>Not at all</u>	<u>Don't know</u>	<u>Skipped</u>	<u>A great deal/A good amount (net)</u>	<u>Not much/Not at all (net)</u>
Democrats in Congress								
February 9-10, 2024	31	20	17	12	19	1	51	29

TOPLINE & METHODOLOGY

2. How much, if at all, do you blame each of the following for Congress not passing legislation intended to decrease the numbers of illegal border crossings at the U.S.-Mexico border?
(Continued)

Republicans in Congress	<u>A great deal</u>	<u>A good amount</u>	<u>Not much</u>	<u>Not at all</u>	<u>Don't know</u>	<u>Skipped</u>	<u>A great deal/A good amount (net)</u>	<u>Not much/Not at all (net)</u>
February 9-10, 2024	31	22	13	13	20	1	53	26

3. As you may know, Justice Department special counsel Robert Hur has decided not to criminally charge Joe Biden for his handling of classified documents after he left office as vice president. Do you think Joe Biden should or should not have been charged with a crime in this case?

	<u>Should</u>	<u>Should not</u>	<u>Don't know</u>	<u>Skipped</u>
February 9-10, 2024	38	34	28	1

4. Do you think Donald Trump should or should not have immunity from criminal prosecution for actions he took while he was president?

	<u>Should</u>	<u>Should not</u>	<u>Skipped</u>
February 9-10, 2024	33	66	1

5. If re-elected, Biden would be 82 years old at the start of his second term and if elected again, Trump would be 78 years old at the start of his second term. Do you think:

	<u>Only Biden is too old for another term as president</u>	<u>Only Trump is too old for another term as president</u>	<u>Both are too old for another term as president</u>	<u>Neither is too old for another term as president</u>	<u>Skipped</u>
February 9-10, 2024	27	3	59	11	1
